Job Type	Full-Time

About Company:

GARUDAASTRA, Established in 2019 by swarm of young and zestful Aeronautical engineers, passionate about design, development and deployment of Aerial & Space vehicles. Our Journey started by bringing flying capabilities for various well-known venture's and failure Unmanned Aerial Vehicle models through redesigning with optimization. Consequently experimenting, learning and experiencing the art of engineering design led us here in the Unmanned Aerial Vehicle /Drones realm, featuring and demonstrating the real-time challenges of UAV applications with present-day.

GARUDAASTRA also provides all CAE services & Product Development Services to different Engineering fields like Aerospace & Defence, Automotive, marine, railways, oil & Gas etc.

We offer the innovative design for unmanned aerial systems to meet challenging applications in current world scenario and customization in existing design to increase the number of solutions. We also extend our expertise in Design, Development and services to all UAV based industries and manufacturers other drone service providers.
